

Carton Clamp Attachment

Carton Clamp Attachments - The Carton Clamp is among the most adaptable forklift additional parts, used to handle lots of unsecured objects on a pallet like for example canned goods, frozen cartons, appliances or furniture. Large rubber pads gently press both sides of the load, gently lifting it up to transport it to its next place. Carton Clamps were specifically designed to be used in the warehousing, electronics, beverage and appliance industries. Industries who use these clamps actually save a lot of money since they don't have to purchase, maintain, store or ship pallets. Carton Clamps allow for pallet free handling, greatly saving warehouse space.

Side-shifting is actually one of the standard features on all Carton Clamps. This allows accurate alignment to be achieved during load placement. Close piling of the load is maintained because of the slim arm design and the pivoting pads made of aluminum. The close piling gets rid of unnecessary spaces amid rows of stock and further space is gained in view of the fact that the pricey pallets are likewise eliminated.
