

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country voyage in their RV. Recently retired, after spending numerous years working with his brother to develop their crane company into an industry leader, John had no idea that fateful trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling technologies was the end consequence of a road trip.

All through their journey, John reacquainted himself with former business connections along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered an infinite market for a product that could quickly and securely lift individuals in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John formed a joint venture with two friends and purchased a metal fabrication company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty personnel, they designed and sold the first JLG aerial work platform. The company incorporates many of the basic design essentials of that original lift into existing models.

JLG forklifts have come a ways since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. At present, the business proudly continues to expand itself into different markets globally and develops new products to make sure customers are capable of being more effective and perform in the workplace within a safer environment.
